REASONS FOR ALLOWANCE

1. Claims 1-9 are allowed in light of the Applicant's amendment and arguments. The following is a statement of the examiner's reasons for allowance. The present invention relates to improved Wavefront Coding Optics for controlling focus related aberrations, and methods for designing such Wavefront Coding Optics. Regarding independent claims 1, 16 and 19, the prior art fails to disclose an improved Wavefront Coding Optics having the characteristic that the central region of the applied phase profile is essentially constant, while the peripheral region of the phase profile have alternating increasing and decreasing phase relative to the central region. The claimed invention is therefore considered to be in condition for allowance as being novel and non-obvious over prior art.

2. The prior art taken either singly or in combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that a rejection under 35 USC 102 or 103 would be improper. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Other Information/Remarks

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
